About us

Estrategia Didáctica (Didactic Strategy) promotes educational justice, social transformation and pedagogical innovation. In order to achieve this, we offer education services designed to enhance diverse social actors and to professionalize the organizations from the social, public and private sectors to increase their impact.

Culture

Estrategia Didáctica is a Social and Solidarity-Based Economy project that promotes educational justice, social transformation and pedagogical innovation. Besides, we aim at self-managing our members' work, and promoting their professional and personal development with social commitment within a framework of respect for the environment and the integrity of every living creature. We pursue self-sustainability and invest the surplus income in the development of diverse solidarity initiatives. We reject any form of violence and, in contrast, we promote the transformative peace understood as the one seeking the good living of every actor in society within the respect towards political and cultural diversity.

History

Estrategia Didáctica started in 2012 as an enterprise within the framework of the *Centro de Educación Popular DESDE EL PIE* (Popular Education Center from the Bottom) and subsequently it was established as a social organization.

Services

- Technical consulting and training in CSOs management, socio-educational projects and programs, pedagogical innovation, among others.
- Presence-based and online course development.
- Educational design of teaching materials and courses.
- Content development for web pages, social networks, teaching materials, among others.
- Drafting and editing of all kinds of texts.
- Communication and graphic design.
- Presence-based and online tutoring for students from all levels of education.

Programs

Good Solidarity Internships

Good Solidarity Internships is a volunteer program, in accordance with *Act 25.855 of Social Volunteering*, promoting solidarity internships by involving students and professionals from various disciplines within the framework of our educational organization and other institutions with which we coordinate actions in order to enhance their professional and personal development with social commitment. The organization offers the following benefits as compensation:

- Information about the different activities promoted by the organization.
- Letter of recommendation and references.
- Free access to the courses offered by the organization.
- Full or partial scholarships related to the performance area.
- Participation in trainings and events.
